A FAMILY DENTAL PRACTICE

Welcome to our practice! We are excited about the opportunity to serve you. If you are looking for high quality dentistry in a family, friendly environment, then you are going to love being part of our dental family!

Our mission at Sweet Tooth Dental is the prevention and elimination of dental disease and deterioration of oral health. Through comprehensive, individualized care, we educate and partner with our patients to help them achieve improved health, appearance, and self-confidence consistent with their goals and values.

The primary goal of our practice is to help you, and all of our patients, keep their natural teeth for life. We believe in developing real relationships with our patients based on sharing information honestly on all oral conditions and possibilities of treatment that are in your best interest. We believe you should be completely informed of the advantages and disadvantages of treatment alternatives so that you may make a choice that suits you.

In the past, most dental treatment was carried out without a plan, "patchwork" or "maintenance" dentistry. Today, in order to help you keep your teeth for life, we take a great deal of time and effort to help you understand your present conditions and develop a master plan of treatment. Once your master plan is developed and discussed, it will be your responsibility to complete the plan in a time period that works for you and meets the objectives for your dental health.

If you have any questions concerning our findings or your master plan of treatment, please don't hesitate to ask. We are available to discuss any concerns you may have. We are excited about being part of your journey to oral health!!
